ETM[®] (Enterprise Telephony Management) System UTA Appliance Build 9.0-63 Release Notes

Issue Addressed in This Update

- **ETM-27454**—UTA Appliance failed to properly process a SIP URI containing %23 (URL-encoded representation of '#').

Who Should Install This Software

All customers running v9.0.2 or later of the ETM[®] System with UTA Appliances should install this update. To obtain the update, contact SecureLogix Technical Support.

More Information

This update strips the %23 or # characters if found in a source or destination number provided to the UTA appliance from the Cisco ISR/ASR/CSR. No special configuration is required.

Installing this Update

This update is installed using the normal appliance software package push mechanism in the ETM GUI.

Current Application Versions as of This Update

- ETM Client and Server applications—9.0.3 Build 19
- Appliance packages:
 - UTA—9.0-63
 - SIP Proxy—9.0-208
 - All other Appliance types*—7.1.90

**Does not apply to the EOL 1060.*
