Memo

To: SecureLogix® Customers

From: Jane Byrne, Product Manager

Date: December 14, 2006

Re: Change in Daylight Savings Time

Beginning in 2007, the United States and its territories will see Daylight Savings time extended by about a month. For those areas that observe DST this means in 2007, daylight time begins on March 11 and ends on November 4 while in 2008, daylight time begins on March 9 and ends on November 2. This change is in accordance to an energy bill passed by the U.S. Congress in 2005.

To ensure the ETM® System properly transitions to the new start and end dates, SecureLogix® recommends customers apply a patch to the Java Runtime Environment (JRE) – an application which was included with the ETM® System when it was first installed. Detailed instructions on how to obtain and install the JRE patch will be available through the SecureLogix® online Knowledge Base (http://support.securelogix.com/knowledgebase.htm) in February 2007.
