Release Notes for ETM[®] System v5.1 Update 6

Who Should Install This Software

ETM[®] System v5.1 Update 6 is recommended only for customers currently running v5.1 who are experiencing the issue described in this article, and those who are upgrading from a system running v5.0.2 Update 3 or higher. Visit <http://support.securelogix.com/updates/index.htm> to obtain the update. It is a cumulative software update that includes all fixes and enhancements issued since Release 5.1.

This software update can only be installed on ETM System Software v5.1. If you are running a previous version of ETM software, please contact your Account Executive or SecureLogix Customer Support for updated software.

About This Document

This document contains important information about ETM[®] System v5.1 Update 6. The ETM System includes the ETM Communications Appliances, ETM Server software, and the ETM applications: the Performance Manager, the Voice Firewall, the Usage Manager, AAA Services for the Voice Firewall, the Voice IPS (Intrusion Prevention System), and the Call Recorder.

Issues Addressed in this Update

- 6010 – SMDR resolution does not use correct date

***Note:** For a description of the changes in update v5.1 Updates 2, 3, 4, and 5, see the SecureLogix Knowledge Base.*

Versions Installed in this Update

ETM Management Server and Client Software—5.1 build 18-9

ETM Appliance Software—5.1.16
