

PolicyGuru® Solution v3.1.2 Standalone CAS Agent Release Notes

Knowledge Base Article #PG4783

Synopsis

This document contains important information about the PolicyGuru® Solution v3.1.2 Standalone CAS Agent feature, which is deployed as an update to an existing PolicyGuru System. You must have v2.6.x or v3.1.2 installed to implement this update.

What's New in this Update

- **Ability to deploy CAS Agent on a separate server**—This update enables CAS Agent to be deployed on a separate server to reduce resource load on the Mediation Server for large Orchestra One™ Call Authentication System (CAS) deployments. This feature also enables/facilitates High Availability (HA) for the CAS Agent service, planned for a future release—separating this component enables adding functionality like redundancy and failover.

Installation and Configuration Instructions

See the following article in the SecureLogix® Knowledge Base for instructions for implementing the Standalone CAS Agent feature on a PolicyGuru Solution v2.6.x or v3.1.2 deployment.
